Enabling Multifactor Authentication

Please note that this is a **one-time set up process**.

1. From your web browser, navigate to <http://dayforcehcm.com>

2. Enter in your **login information**

The screenshot shows the CERIDIAN Dayforce login interface. At the top, the logo 'CERIDIAN Dayforce' is displayed. Below it, there are three input fields: 'Company' with 'RECIPE' entered, 'User Name', and 'Password'. At the bottom of the form is a blue 'Login' button.

3. You will be prompted to enable multifactor authentication for your Dayforce account in one of two different ways:

i) Dayforce uses a third party application called Authy that could be downloaded on your device to use multifactor authentication. It is listed as the recommended option by Dayforce.

ii) Multifactor authentication can also be used by being sent an SMS text message or voice call.

Set up Multifactor Authentication

Your company requires you to use Multifactor Authentication to verify your identity and keep your information secure.

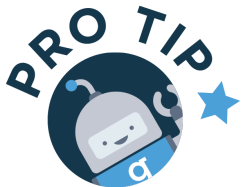

To log in, you will need your password and a unique verification code.

☐ Smartphone App (Recommended)

Quickly authenticate with one tap using the Authy Smartphone App

☒ SMS Text Message or Voice Call

Receive a text message or a voice call

It is **recommended** that **the second option of SMS text message or voice call is used** to not encourage an additional application on your device.

Once complete, select **Continue**.

Continue

PAYROLL MANAGEMENT

MULTIFACTOR AUTHENTICATION

4. Enter in your **contact information** to be contacted by SMS text message or voice call:

Please note that you will be contacted at this number each time you login to Dayforce.

Contact Information

We will use your phone number(s) to verify your identity when you log in to Dayforce.

We recommend using your mobile phone as the primary phone number.

Country
United States of America/Canada

Phone Number *
1234567890

Extension

5. Verify the **phone number** provided, and then select whether to receive multifactor authentication messages via text message or phone calls:

Verify Primary Phone Number

We will send one-time code to

+(1) (647) 432-3234

How would you like us to send you the code?

☒ Text Message

☐ Voice Call

6. The phone number provided will receive a **one-time verification code** to the provided phone number. Enter it into the **Verification Code box** once received:

Enter Verification Code

Verification Code*
943124

Text Message
Today 1:33 PM

Your verification code is: 943124

PAYROLL MANAGEMENT

MULTIFACTOR AUTHENTICATION

Once complete, select **Continue**.

Continue

7. Once the one-time setup is complete, multifactor authentication will be enabled each time Dayforce is logged into:

Congratulations!

You're all set up. The next time you log in, you will be protected by Multifactor Authentication.

Using Multifactor Authentication

Please note that multifactor authentication will be used **each time you login** to Dayforce.

1. Upon logging in to Dayforce, users will be prompted to use their preferred **multifactor authentication method**:

How would you like to log in?

Select the log-in that you'd like to use.

Please contact your client administrator for any account-related issues.

☒ Text Message Primary Phone
+1 (64x) XXX-3235

☐ Voice Call Primary Phone
+1 (64x) XXX-3235

2. Upon receiving the **verification code**, enter it into the **Verification Code box**:

Verify SMS Code

We sent a text message with a one-time code to your phone

+1 (64x) XXX-3235

Please contact your client administrator for any account-related issues.

MULTIFACTOR AUTHENTICATION

The screenshot shows a mobile app interface for verifying an SMS code. At the top, the status bar shows the time 2:29, 5G signal, and a battery icon. Below the status bar, there's a header with a user profile icon, the number 28849, and the text "Your verification code is: 607975" with a "now" label. A back arrow is on the left. The main heading is "Verify SMS Code". Below it, a message states: "We sent a text message with a one-time code to your phone". The phone number "+1 (64x) XXX-3235" is displayed. A note says: "Please contact your client administrator for any account-related issues." There is a text input field labeled "Verification Code*". At the bottom, there are two buttons: a blue "Log In" button and a light blue "Log in another way" button.

The **Dayforce mobile app** will also prompt the user for multifactor authentication each time once the set up process is complete.

Once complete, select **Log In**.

A large blue button with the text "Log In" in white, centered within a double blue border.
